QUEUE2PLAY - SIMPLE SYSTEM TEST DOCUMENTATION

1 / Accounts and login

Verified 11 October 2026: compilation passed; 43,586 full-suite checks and 16 supplementary assertions passed. These rows summarize executed automated tests using isolated sample data.

Test	Input	Expected Output	Actual Output	Result
1	Create Maria Santos / marianew / maria@example.com; confirm the edited password.	One regular customer account; details and password survive reload.	One CLIENT/REGULAR account saved and reloaded with the edited details.	**PASS**
2	Full name: Juan D. Cruz, then A....	Accept letters/spaces/dots; reject a name without two letters.	Juan D. Cruz accepted; A.... rejected.	**PASS**
3	Username: a12, then ab.	Minimum 3 characters and at least one letter.	a12 accepted; ab rejected.	**PASS**
4	Email: a.b+tag@example.com, then a@@example.com.	Accept a valid format; reject a malformed address.	Valid address accepted; malformed address rejected.	**PASS**
5	Passwords: abcdefgh, 12345678, then abc defg.	Accept letters-only/digits-only; reject spaces. Length 8-20.	Letters/digits accepted; spaces and out-of-range lengths rejected.	**PASS**
6	Login: spaced uppercase SIGNIN@EXAMPLE.COM with the matching password.	Trim identifier and match email without regard to case.	The signin account authenticated.	**PASS**
7	Login with a password using the wrong letter case.	Reject with Incorrect username/email or password.	Authentication rejected with the generic error.	**PASS**
8	Three failed logins across identifiers; run the cooldown check.	Show attempts 1/3, 2/3, 3/3 and a 30-second countdown.	Attempt/countdown assertions passed; real cooldown measured 30 seconds.	**PASS**

Basis: tests/BehaviorRegressionTest.java and tests/README.md. This is a main-feature test guide, not a defect report. Scripted layout tests do not replace a manual check of the actual terminal.

QUEUE2PLAY - SIMPLE SYSTEM TEST DOCUMENTATION

2 / Browse, search, sort and selection

Each PASS summarizes executed regression or supplementary documentation assertions. Sample records belong to disposable fixtures, not the live catalog or customer accounts.

Test	Input	Expected Output	Actual Output	Result
9	Select PS5, then search Xbox in that platform list.	Search only the selected platform; no Xbox match.	PS5 list stayed selected; Xbox search had no matches.	**PASS**
10	Search p001 in the catalog fixture.	Case-insensitive match to the complete ID.	One matching game found.	**PASS**
11	Search MINE in all games.	Find titles containing that text on any platform.	Two Minecraft titles matched.	**PASS**
12	Search xBoX, then Xbo.	Match a complete platform name; reject the partial name.	xBoX matched 3 games; Xbo matched none.	**PASS**
13	Use all four title/price sorts, then default.	Correct ascending/descending order; equal keys stay stable; inventory unchanged.	All sort orders and stability passed; default inventory order preserved.	**PASS**
14	Apply title sort, then X to clear search.	Restore the platform list, keep the sort and return to page one.	Search cleared; title sort retained; page one displayed.	**PASS**
15	Go to catalog page two; select displayed number 1.	Select that page's first displayed game.	P004 selected in the test fixture.	**PASS**
16	Browse long titles at different configured terminal sizes.	At most 9 games per page; reduce page size when needed.	Pages respected the limit and kept tested choices/prompt within the viewport.	**PASS**

Basis: tests/BehaviorRegressionTest.java and tests/README.md. This is a main-feature test guide, not a defect report. Scripted layout tests do not replace a manual check of the actual terminal.

QUEUE2PLAY - SIMPLE SYSTEM TEST DOCUMENTATION

3 / Orders, pricing and the queue

Each PASS summarizes executed regression or supplementary documentation assertions. Sample records belong to disposable fixtures, not the live catalog or customer accounts.

Test	Input	Expected Output	Actual Output	Result
17	Select the same game repeatedly in one cart, up to 3 copies.	Combine quantities in one line and submit one request for that game.	One 3-copy request created; stock remained unchanged.	**PASS**
18	Submit three separate 1-copy requests for the same game; try a fourth.	Allow repeat requests up to 3 queued copies; block the fourth.	First three saved; fourth blocked without advancing the queue number.	**PASS**
19	Stock 2: submit cart quantity 3, then quantity 2.	Reject excess stock quantity; accept exact stock quantity.	Quantity 3 rejected; quantity 2 accepted by submission validation.	**PASS**
20	Custom days: 31, -1, abc, then 30; separately try 1.	Reject invalid input; allow custom duration 1-30.	Invalid inputs rejected; 30 and 1 accepted.	**PASS**
21	VIP rental using the $5 three-day rate, quantity 1.	Apply the existing 10% membership discount.	Rental amount recorded as $4.50.	**PASS**
22	Choose discard, answer No; later confirm cancellation with Yes.	No keeps the draft/step; Yes cancels the unsaved order.	Draft preserved after No; confirmed cancellation left queue/stock unchanged.	**PASS**
23	Four eligible VIP requests and one regular; VIP streak starts at 0.	Three VIP, one regular, then the remaining VIP.	Predicted queue IDs were 1, 2, 3, 5, 4; positions matched.	**PASS**
24	Stock 3 with two requests for 2 copies each.	One ready, one waiting; receipt and admin/customer positions agree.	Waiting count was 1 in the matching displays; preview changed no stock.	**PASS**

Basis: tests/BehaviorRegressionTest.java and tests/README.md. This is a main-feature test guide, not a defect report. Scripted layout tests do not replace a manual check of the actual terminal.

QUEUE2PLAY - SIMPLE SYSTEM TEST DOCUMENTATION

4 / Administrator processing and saved results

Each PASS summarizes executed regression or supplementary documentation assertions. Sample records belong to disposable fixtures, not the live catalog or customer accounts.

Test	Input	Expected Output	Actual Output	Result
25	Checkout: ENTER, then Y on a ready request.	Approve once, deduct stock, create rental/history and save.	Checkout/session, stock, history and reload assertions passed.	**PASS**
26	Cancel a queued request and confirm Y.	Remove the request without deducting stock; record the cancellation.	Request removed; stock unchanged; numbered cancellation slip recorded.	**PASS**
27	12-request batch preview: F, P, F, YES.	Browse pages, then approve the entire predicted batch.	All 12 approved in order; stock deducted once; approvals reloaded.	**PASS**
28	Large batch preview: navigate with F/P, then N.	N declines the batch; preview/navigation changes no transaction state.	Decline returned false; queue, stock and VIP streak stayed unchanged.	**PASS**
29	Return list: select 3,1; confirm YES. Separately decline with NO.	Complete selected returns in due-date order; No leaves rentals active.	Two selected rentals completed with restored quantities; declined return unchanged.	**PASS**
30	Add Game: edit one field, return to summary and save.	Keep the other entered values and persist the edited game.	Individual edits retained other fields; saved values survived reload.	**PASS**
31	40 receipt/result records; N/P and named Back/Dashboard choices.	All records accessible; full totals and prompt fit each tested page.	Every record reached at 4 widths and 5 heights; totals/state preserved.	**PASS**
32	Long records; three invalid page keys; plain and colored layouts.	Wrap complete text; show error and usable choices without piled-up panels.	Complete titles and retry bounds passed; 42,833 plain / 42,835 colored checks passed.	**PASS**

Basis: tests/BehaviorRegressionTest.java and tests/README.md. This is a main-feature test guide, not a defect report. Scripted layout tests do not replace a manual check of the actual terminal.

QUEUE2PLAY - SIMPLE SYSTEM TEST DOCUMENTATION

5 / Inventory, membership and viewing records

Each PASS summarizes executed regression or supplementary documentation assertions. Sample records belong to disposable fixtures, not the live catalog or customer accounts.

Test	Input	Expected Output	Actual Output	Result
33	Stock 3: Add Stock, quantity 2, confirm Y.	Increase available stock to 5 and save the update.	Available stock became 5.	**PASS**
34	Stock 5: Decrease Stock, quantity 1, confirm Y; reload.	Reduce available stock to 4 and keep it after reload.	Stock became 4; the reloaded game also had 4 copies.	**PASS**
35	Delete a game with one pending request and no active rental; confirm Y.	Delete the game and its pending request, then save.	Game and request removed; deletion survived reload.	**PASS**
36	Try to delete a game that has an active rental.	Block deletion and keep the game and rental.	Correct error displayed; both game and rental remained.	**PASS**
37	Regular customer: confirm VIP upgrade with an existing queued request.	Upgrade membership and refresh queued priority; save both.	Customer and queued request became VIP and retained VIP after reload.	**PASS**
38	View three active rentals: two overdue and one due in the future.	Active list: earliest due first. Overdue list: only the two late rentals.	Active order matched due dates; overdue list excluded the future rental.	**PASS**
39	View three history records and two audit actions.	Show newest records/actions first without removing entries.	History and audit order matched; stored entry counts unchanged.	**PASS**
40	Open an empty history, queue, rental or audit screen; use the displayed Back/Dashboard key.	Keep the empty screen visible until navigation is entered.	Empty-screen navigation assertions passed; no rental state changed.	**PASS**

To check manually: run .\run.ps1. In Admin Checkout use R for Receipt or A for the batch preview. Receipts/results use N/P; batch previews use F/P, with Y to approve and N to decline. Page keys appear only when needed. Live password masking and terminal appearance were not manually verified.
